

# Segregation

D-16

Segregation was a bad thing to do. When other children aren't able to get an education. When people don't get an education as good as other white children did. I don't like it. I am glad that they were thinking and that they were not wrong but they were right to change and see how much education meant to black people.

I know that I was in for something. When Mrs. Derrick read the title I started to laugh. But then when she read I was amazed at what I was hearing. Everything was strong and had a lot of great vocabulary. I am also eager and surprised to be meeting Dr. Brown.
