

I am 10 years old and I work in a mill after school. My whole family works there also. My family works nine hours a day and six days a week. When I get home from school, I work only four hours in the afternoon. My job is to clean up. The pay is not great and the work is hard. Some people have died with a disease called tuberculosis.

While I was at work one day, I saw a person get his hand caught in the machine that he was working on. It is dangerous at the mill. When we get off work, we eat supper and go to bed. On Sundays, we go to church. After dinner the kids play ball. This is the best day of the week!!
