

# Is America losing her identity?

- Do Americans today feel truly part of America. Explain why?

Yes and no. Some Americans with a different culture or background might be discriminated against. Although the Native Americans were the first here, they still are not given the respect and money they need.

- In your opinion should America have continued the policy of isolation or did we make the right choice in using our influence in other countries?

America should continue being influenced by other cultures. We learn and benefit so much from different cultures.

- Should America allow illegal immigrants to get green cards & citizenship easier or should we secure our borders?

Allow them to come in but secure our borders.
